خلاصه مقاله:

The Shiites have always been eager to know the Ahl al-Bayts' history and lifestyle. However, they have confronted with repeated historical data. Using a descriptive-analytical method, this paper is to investigate the solutions for reducing the vulnerability of the historical studies scope limitations about the Ahl al-Bayts' lives. The research findings show that development of cultural, civilizational and exemplary approaches, as well as temporal and spatial developments for investigating the effects and roles of Ahl al-Bayts beyond their era, investigating their thoughts history and their theoretical and civilizational and considering a stylistic approach in political, economic, and social areas could develop the scope of studies about the Ahl al-Bayts' conducts. Therefore, the vulnerabilities identified from the historical studies scope limitations about the Ahl al-Bayts' lives could be reduced.
