خلاصه مقاله:

Once a word heard, the very concept of it is understood but studies in the domain of sociolinguistics have shown that every word can have different meanings in different contexts. As have been noted, different elements such as tone of speaker, listener, and goal of speech can change the intended meaning. In this paper, this phenomenon was sketched for a simple word such as OK. This study would be as a bridge to the world behind the discourse markers and vocabularies used in the lexicon of a language.

کلمات کلیدی:

context, discourse marker, meaning, OK
