## خلاصه مقاله:

recent. However, the quality of the environment and the physical and functional disorders often underlie the absence of people in the centers, and to reduce their social status. This leads to the separation of such spaces of everyday life and they are left abandoned. city of these payments. In addition, analysis of past years reflects the fact that the broad participation of users and Msnvlyn the possibility of achieving the goals of such programs increases. But the realization of sustainable participation and presence of the people involved depends on the creation of the necessary conditions.

## کلمات کلیدی:

ideal urban space, sidewalks, socialization, social capital
