خلاصه مقاله:

In this paper first we define the notions of positive implicative hyper MV -ideals of types 1,2,3 and 4 in hyper MV -algebras and we investigate the relationship between of them . Then by some examples we show that these notions are not equivalent. Finally we give some relations between these notions and the notions of (weak) hyper MV -ideals and (weak) hyper MV -deductive systems of hyper MV -algebras.

کلمات کلیدی:

Hyper MV -algebra, Hyper MV -ideal, Hyper MV -deductive system, Positive implicative hyper MV -ideal
